Sem-7	AITS	2015	7.43
Sem-6	AITS	2015	6.57
Sem-5	AITS	2014	4.63
Sem-4	AITS	2014	6.03
Sem-3	AITS	2013	4.83
Sem-2	AITS	2013	6.61
Sem-1	AITS	2013	6.32
XII (Gujarat Higher Secondary Education Board, Gandhinagar)	Swastik school of science, Rajkot	March-2012	68.01%
X (Gujarat Secondary Education Board, Gandhinagar)	Krishna science school, Rajkot	March-2010	82.16%

CPI : 6.21

Projects

Travel booking engine   **(4th year – Major Project)**
Description : Online Travel Management System is developed to be used by bus travel
　　　　　　　agencies and end-users.
　　　　　　　Travel agencies use this project for maintaining their bus trip schedules for   daily
　　　　　　　buses or for some days of week between different cities they serve. The operators
　　　　　　　reserve tickets for customers through this system. As well as customer also book
　　　　　　　ticket.
　　　　　　　This system is online. So once a seat is booked, its effect is visible through   all
　　　　　　　offices of that travel company.
　　　　　　　This website also shows the time-table of various trips and also the fares   and
　　　　　　　arrival/departure times of bus.
　　　　　　　Shows details about different types of the buses, for e.g. A/C, Non A/C, 2/3 sitting,
　　　　　　　sleeper, semi-sleeper etc.
　　　　　　　Trip status indicates whether any seats are available or not for a trip and if   not, it
　　　　　　　also suggests customer about next bus timings to the same city.
　　　　　　　Moreover, this system also shows the graphical view of sitting   arrangement
　　　　　　　which helps customers and operators for reserving seats.
Technologies : JAVA and MySQL server

Frameworks : Struts, Servlet, Tiles, MVC
Team Size   : 3

Tone Liber :- (Other Projects)
Description :   Tone Liber is an online music streaming website, it uses AJAX to send and receive the data, thus is very fast and no refreshing is needed during the user session except for signing in. Different artists can upload their individual sound tracks or complete albums (with the options like genre, album art, tags, etc.) on the website and the website users can listen, like, comment, share and download the individual track or album. Users can also create their own playlist from thousands of tracks and share them. User can create their profile, they can add profile picture, contact details, achievements. Registered users can also chat with each other. The website is responsive, so it can run on all different resolution devices very easily and uniformly, and that makes the user interaction very easy. The complete website data is stored in the cloud hosting, so you can listen to your favorite music anytime, anywhere.
Technologies : JAVA with AJAX and MySQL server
FrameWork : Struts,Servlet,Tiles,MVC
Team Size   : 3

Technical Skills

- Programming Languages : JAVA, C, C++
- Frontend technologies   : HTML
- Database Systems   : MySQL
- Operating System   : Windows 7-8, Vista, XP

Soft Skills

- Planning & Time Management
- Interpersonal Relationships
- Hard Working
- Honest

Personal Profile

- Father's Name   : Madhavajibhai Mendapara
- Date of Birth   : 09-02-1995
- Languages Known   : English, Hindi and Gujarati
- Current Location   : Rajkot
- Joining Time   : According to your connivance

Declaration

   I consider myself familiar with Information Technology Aspects. I am also confident of my ability to work in a team. I hereby declare that the information furnished above is true to the best of my knowledge.
